

RATING ACTION COMMENTARY

Fitch Rates \$288MM University of Connecticut GO Bonds 'A'; Outlook Stable

Wed 18 Nov, 2020 - 12:38 PM ET

Fitch Ratings - New York - 18 Nov 2020: Fitch Ratings has assigned an 'A' rating to \$288 million GO bonds issued by the University of Connecticut (UConn), consisting of:

--\$169,555,000 GO bonds 2020 Series A;

--\$118,725,000 GO bonds 2020 Refunding Series A.

The bonds are expected to be offered by negotiated sale on Dec. 8, 2020.

The Rating Outlook is Stable.

SECURITY

The bonds are a general obligation of UConn, additionally secured by a pledge of and lien on a state of Connecticut debt service commitment for principal and interest, appropriated from the state's general fund without further legislative approval.

ANALYTICAL CONCLUSION

UConn's GO bonds are rated at 'A', one notch below Connecticut's 'A+' IDR based on the state's debt service commitment equal to principal and interest and appropriated without further legislative approval. Higher education is a constitutional state priority and legal protections are strong.

Connecticut's 'A+' IDR and GO rating reflect the large deposits it has made in recent years to the budget reserve fund (BRF), the state's rainy day fund, detailed budget monitoring, mechanisms to reduce spending and a willingness to raise revenues. These provide the state with broad flexibility as it confronts economic and revenue losses expected through the end of the fiscal 2020-2021 biennium due to the coronavirus pandemic. The ratings also incorporate Fitch Ratings' expectation that the state's wealthy and mature economy is likely to be flat or grow only slowly over time, a factor that will continue to challenge the state in matching revenues to expenditures. The long-term liability burden remains well above the U.S. state average. Although carrying costs for liabilities are a moderate burden on the state's resource base, they limit expenditure flexibility compared with most states.

ECONOMIC RESOURCE BASE

Connecticut has a diverse and mature economic base anchored by a large finance sector and important manufacturing, education and health sectors. The impact of the Great Recession on Connecticut was severe, and economic growth in the recovery that followed trailed that of the U.S. The state is the wealthiest in the U.S. as measured by per capita personal income. Prior to the coronavirus pandemic, growth had also begun to advance in key finance and manufacturing sectors.

KEY RATING DRIVERS

Revenue Framework: 'a'

The state's largest tax revenue source, personal income tax (PIT), is subject to considerable cyclical volatility, although the state has instituted measures to shield the general fund from its volatility. Sales, corporate income, transportation and gaming taxes diversify resources. Tax policy changes have been required since the Great Recession to boost revenues, and Fitch believes modest future economic expansion will continue to constrain underlying revenue growth potential. The state has unlimited legal ability to levy taxes.

Expenditure Framework: 'aa'

Connecticut's natural pace of spending growth is expected to outpace revenues given projections for weak revenue growth. The state has consistently demonstrated the ability to cover its comparatively high fixed costs, including making full actuarial contributions to pensions for more than a decade, and it benefits from the large degree of budget autonomy common to states.

Long-Term Liability Burden: 'a'

The state's long-term liability burden is elevated and among the highest for U.S. states, but still considered moderate. Long-term debt consists primarily of GO and transportation borrowings, with much of GO borrowing undertaken on behalf of local schools. Net pension liabilities are more significant, with the state carrying obligations for state retirees as well as for local school teachers.

Operating Performance: 'a'

Gap-closing capacity is strong and resiliency has improved with sizable deposits to the BRF in fiscal years 2018 and 2019, as required under the state's revenue volatility cap enacted in 2018. Cyclical revenues, budgetary burdens from fixed costs and forecast out-year budget gaps indicate structural challenges that remain unaddressed, although close budget monitoring, including frequent revenue forecasting, allows the state to quickly identify revenue underperformance and implement corrective actions.

RATING SENSITIVITIES

Factors that could, individually or collectively, lead to a positive rating action/upgrade:

--Improved Economic and Revenue Growth Prospects: Strengthened trends in economic and revenue growth over a longer time frame;

--Lower Liability Burden: The state's ability to gradually lower its elevated liability burden while managing comparatively high fixed cost burden;

Factors that could, individually or collectively, lead to a negative rating action/downgrade:

--More Severe Downturn: Inability to address the fiscal effects of a return to economic contraction, consistent with Fitch's coronavirus downside scenario, and maintain an adequate level of fundamental financial flexibility, or an inability to quickly rebuild fiscal flexibility once growth resumes;

--Growing Liabilities and Structural Challenges: Erosion of strong budget management practices, including actions during the current recession that further build the state's liability burden or enlarge structural challenges.

BEST/WORST CASE RATING SCENARIO

International scale credit ratings of Sovereigns, Public Finance and Infrastructure issuers have a best-case rating upgrade scenario (defined as the 99th percentile of rating transitions, measured in a positive direction) of three notches over a three-year rating horizon; and a worst-case rating downgrade scenario (defined as the 99th percentile of rating transitions, measured in a negative direction) of three notches over three years. The complete span of best- and worst-case scenario credit ratings for all rating categories ranges from 'AAA' to 'D'. Best- and worst-case scenario credit ratings are based on historical performance. For more information about the methodology used to determine sector-specific best- and worst-case scenario credit ratings, visit [\[https://www.fitchratings.com/site/re/10111579\]](https://www.fitchratings.com/site/re/10111579).

CREDIT PROFILE

UConn GO bonds are issued by and carry the GO pledge of UConn, but their security and the 'A' rating rest with the debt service commitment of the state. Principal and interest are paid annually from the state's general fund, appropriated and obligated for payment by the state treasurer without requiring further legislative approval. Fitch rates the state's own GO bonds 'A+', on par with the IDR. State general fund obligations, with the strength of continuing appropriations, are seen as slightly less secure than the state's GO bonds, and the UConn bonds fall within this category. The state's debt service commitment is separate

from the operating appropriations and allotments that the state makes available to the university and UConn GO borrowing is integrated into the state's overall debt management.

Over the last two decades, the state has prioritized renewal and expansion of facilities at UConn, the state's flagship public university system. The UConn GO bonds have been issued as part of the state's UConn 2000 program, first enacted in 1995 and extended multiple times since. In 2017, the state extended the program from fiscal 2024 to fiscal 2027, although total estimated cost was unaltered at \$4.6 billion, of which \$4.3 billion is being funded by UConn GO bonds benefiting from the state's debt service commitment. Of this amount, about \$3.3 billion in par debt service commitment bonds have been issued to fund university project construction to date, with \$1.5 billion currently outstanding.

Recent projects have been designed to expand UConn research facilities and faculty, particularly in science and technology. The majority of UConn 2000-funded projects have been at the main UConn campus in Storrs with additional projects at the regional campuses and the UConn Health Center (UCH) in Farmington. Current new issue bond proceeds will fund various projects dispersed among these areas and include new academic and research facilities, administrative and support facility improvements, and phase II of UConn's fine arts expansion.

For additional information on the state of Connecticut's IDR, see "Fitch Affirms Connecticut's IDR at 'A+', Rates \$900MM GO Bonds 'A+'; Outlook Stable," published on May 15, available at www.fitchratings.com.

In issuing and maintaining its ratings and in making other reports (including forecast information), Fitch relies on factual information it receives from issuers and underwriters and from other sources Fitch believes to be credible. Fitch conducts a reasonable investigation of the factual information relied upon by it in accordance with its ratings methodology, and obtains reasonable verification of that information from independent sources, to the extent such sources are available for a given security or in a given jurisdiction. The manner of Fitch's factual investigation and the scope of the third-party verification it obtains will vary depending on the nature of the rated security and its issuer, the requirements and practices in the jurisdiction in which the rated security is offered and sold and/or the issuer is located, the availability and nature of relevant public information, access to the management of the issuer and its advisers, the availability of pre-existing third-party verifications such as audit reports, agreed-upon procedures letters, appraisals, actuarial reports, engineering reports, legal opinions and other reports provided by third parties, the availability of independent and competent third-party verification sources with respect to the particular security or in the particular jurisdiction of the issuer, and a variety of other factors. Users of Fitch's ratings and reports should understand that neither an enhanced factual investigation nor any third-party verification can ensure that all of the information Fitch relies on in connection with a rating or a report will be accurate and complete. Ultimately, the issuer and its advisers are responsible for the accuracy of the information they provide to Fitch and to the market in offering documents and other reports. In issuing its ratings and its reports, Fitch must rely on the work of experts, including independent auditors with respect to financial statements and attorneys with respect to legal and tax matters. Further, ratings and forecasts of financial and other information are inherently forward-looking and embody assumptions and predictions about future events that by their nature cannot be verified as facts. As a result, despite any verification of current facts, ratings and forecasts can be affected by future events or conditions that were not anticipated at the time a rating or forecast was issued or affirmed. The information in this report is provided "as is" without any representation or warranty of any kind, and Fitch does not represent or warrant that the report or any of its contents will

meet any of the requirements of a recipient of the report. A Fitch rating is an opinion as to the creditworthiness of a security. This opinion and reports made by Fitch are based on established criteria and methodologies that Fitch is continuously evaluating and updating. Therefore, ratings and reports are the collective work product of Fitch and no individual, or group of individuals, is solely responsible for a rating or a report. The rating does not address the risk of loss due to risks other than credit risk, unless such risk is specifically mentioned. Fitch is not engaged in the offer or sale of any security. All Fitch reports have shared authorship. Individuals identified in a Fitch report were involved in, but are not solely responsible for, the opinions stated therein. The individuals are named for contact purposes only. A report providing a Fitch rating is neither a prospectus nor a substitute for the information assembled, verified and presented to investors by the issuer and its agents in connection with the sale of the securities. Ratings may be changed or withdrawn at any time for any reason in the sole discretion of Fitch. Fitch does not provide investment advice of any sort. Ratings are not a recommendation to buy, sell, or hold any security. Ratings do not comment on the adequacy of market price, the suitability of any security for a particular investor, or the tax-exempt nature or taxability of payments made in respect to any security. Fitch receives fees from issuers, insurers, guarantors, other obligors, and underwriters for rating securities. Such fees generally vary from US\$1,000 to US\$750,000 (or the applicable currency equivalent) per issue. In certain cases, Fitch will rate all or a number of issues issued by a particular issuer, or insured or guaranteed by a particular insurer or guarantor, for a single annual fee. Such fees are expected to vary from US\$10,000 to US\$1,500,000 (or the applicable currency equivalent). The assignment, publication, or dissemination of a rating by Fitch shall not constitute a consent by Fitch to use its name as an expert in connection with any registration statement filed under the United States securities laws, the Financial Services and Markets Act of 2000 of the United Kingdom, or the securities laws of any particular jurisdiction. Due to the relative efficiency of electronic publishing and distribution, Fitch research may be available to electronic subscribers up to three days earlier than to print subscribers.
